

# Rechenhäuser 2 mit Addition bis 20

Variante 1  
Übungsblatt 1

Klasse: \_\_\_\_\_ Datum: \_\_\_\_\_

Name: \_\_\_\_\_

1

a)

A house-shaped addition grid with a triangular roof containing the equation  $= 5$ . The main body of the house is divided into four horizontal rectangular sections. Each section contains a plus sign (+) in the center, with a vertical dashed line extending from the plus sign down to the next section. Each of the four sections also has horizontal dashed lines on either side of the plus sign, indicating where to write the numbers.

b)

A house-shaped addition grid with a triangular roof containing the equation  $= 7$ . The main body of the house is divided into four horizontal rectangular sections. Each section contains a plus sign (+) in the center, with a vertical dashed line extending from the plus sign down to the next section. Each of the four sections also has horizontal dashed lines on either side of the plus sign, indicating where to write the numbers.

2

a)

A house-shaped addition grid with a triangular roof containing the equation  $= 12$ . The main body of the house is divided into four horizontal rectangular sections. Each section contains a plus sign (+) in the center, with a vertical dashed line extending from the plus sign down to the next section. Each of the four sections also has horizontal dashed lines on either side of the plus sign, indicating where to write the numbers.

b)

A house-shaped addition grid with a triangular roof containing the equation  $= 14$ . The main body of the house is divided into four horizontal rectangular sections. Each section contains a plus sign (+) in the center, with a vertical dashed line extending from the plus sign down to the next section. Each of the four sections also has horizontal dashed lines on either side of the plus sign, indicating where to write the numbers.

3

a)

A house-shaped addition grid with a triangular roof containing the equation  $= 17$ . The main body of the house is divided into four horizontal rectangular sections. Each section contains a plus sign (+) in the center, with a vertical dashed line extending from the plus sign down to the next section. Each of the four sections also has horizontal dashed lines on either side of the plus sign, indicating where to write the numbers.

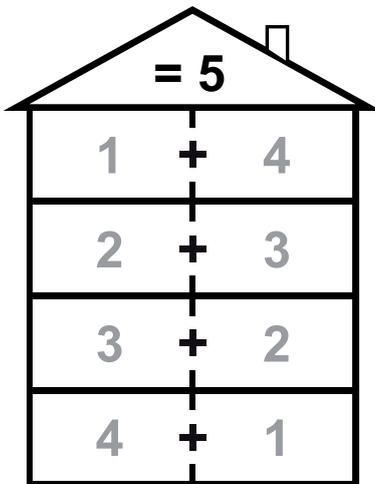

b)

A house-shaped addition grid with a triangular roof containing the equation  $= 19$ . The main body of the house is divided into four horizontal rectangular sections. Each section contains a plus sign (+) in the center, with a vertical dashed line extending from the plus sign down to the next section. Each of the four sections also has horizontal dashed lines on either side of the plus sign, indicating where to write the numbers.
