

①

a)

A house-shaped grid for addition. The roof contains the equation $= 29$. The main body of the house is divided into four horizontal sections, each containing a plus sign $+$ in the center. Dashed lines are provided on either side of each plus sign for writing the addends.

b)

A house-shaped grid for addition. The roof contains the equation $= 22$. The main body of the house is divided into four horizontal sections, each containing a plus sign $+$ in the center. Dashed lines are provided on either side of each plus sign for writing the addends.

②

a)

A house-shaped grid for addition. The roof contains the equation $= 40$. The main body of the house is divided into four horizontal sections, each containing a plus sign $+$ in the center. Dashed lines are provided on either side of each plus sign for writing the addends.

b)

A house-shaped grid for addition. The roof contains the equation $= 25$. The main body of the house is divided into four horizontal sections, each containing a plus sign $+$ in the center. Dashed lines are provided on either side of each plus sign for writing the addends.

③

a)

A house-shaped grid for addition. The roof contains the equation $= 34$. The main body of the house is divided into four horizontal sections, each containing a plus sign $+$ in the center. Dashed lines are provided on either side of each plus sign for writing the addends.

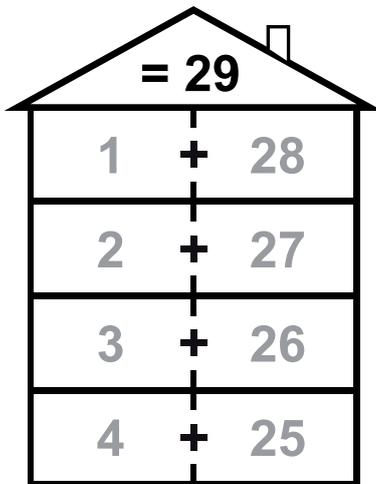

b)

A house-shaped grid for addition. The roof contains the equation $= 47$. The main body of the house is divided into four horizontal sections, each containing a plus sign $+$ in the center. Dashed lines are provided on either side of each plus sign for writing the addends.
