

①

a)

A house-shaped addition grid with a triangular roof. Inside the roof is the equation $= 30$. The main body of the house is divided into four horizontal sections, each containing a plus sign (+) in the center. Dashed lines are provided on either side of each plus sign for writing the addends.

b)

A house-shaped addition grid with a triangular roof. Inside the roof is the equation $= 23$. The main body of the house is divided into four horizontal sections, each containing a plus sign (+) in the center. Dashed lines are provided on either side of each plus sign for writing the addends.

A house-shaped addition grid with a triangular roof. Inside the roof is the equation $= 43$. The main body of the house is divided into four horizontal sections, each containing a plus sign (+) in the center. Dashed lines are provided on either side of each plus sign for writing the addends.

b)

A house-shaped addition grid with a triangular roof. Inside the roof is the equation $= 27$. The main body of the house is divided into four horizontal sections, each containing a plus sign (+) in the center. Dashed lines are provided on either side of each plus sign for writing the addends.

③

a)

A house-shaped addition grid with a triangular roof. Inside the roof is the equation $= 36$. The main body of the house is divided into four horizontal sections, each containing a plus sign (+) in the center. Dashed lines are provided on either side of each plus sign for writing the addends.

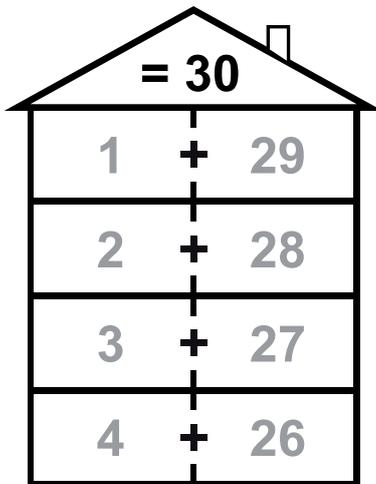

b)

A house-shaped addition grid with a triangular roof. Inside the roof is the equation $= 48$. The main body of the house is divided into four horizontal sections, each containing a plus sign (+) in the center. Dashed lines are provided on either side of each plus sign for writing the addends.
