

①

a)

A house-shaped grid for division. The roof contains the number **= 6**. The main body of the house is divided into 8 horizontal rows by solid lines. A vertical dashed line runs down the center of each row, representing the division symbol. Each row is bounded by horizontal dashed lines above and below the solid lines.

b)

A house-shaped grid for division. The roof contains the number **= 7**. The main body of the house is divided into 8 horizontal rows by solid lines. A vertical dashed line runs down the center of each row, representing the division symbol. Each row is bounded by horizontal dashed lines above and below the solid lines.

②

a)

A house-shaped grid for division. The roof contains the number **= 8**. The main body of the house is divided into 8 horizontal rows by solid lines. A vertical dashed line runs down the center of each row, representing the division symbol. Each row is bounded by horizontal dashed lines above and below the solid lines.

b)

A house-shaped grid for division. The roof contains the number **= 9**. The main body of the house is divided into 8 horizontal rows by solid lines. A vertical dashed line runs down the center of each row, representing the division symbol. Each row is bounded by horizontal dashed lines above and below the solid lines.
