

①

a)

A house-shaped grid for division. The roof contains the number **= 14**. The main body is a rectangle divided into four horizontal sections by solid lines. A vertical dashed line runs down the center of each section. Horizontal dashed lines are placed in the middle of each section, creating a grid for writing the division process.

b)

A house-shaped grid for division. The roof contains the number **= 15**. The main body is a rectangle divided into four horizontal sections by solid lines. A vertical dashed line runs down the center of each section. Horizontal dashed lines are placed in the middle of each section, creating a grid for writing the division process.

②

a)

A house-shaped grid for division. The roof contains the number **= 16**. The main body is a rectangle divided into four horizontal sections by solid lines. A vertical dashed line runs down the center of each section. Horizontal dashed lines are placed in the middle of each section, creating a grid for writing the division process.

b)

A house-shaped grid for division. The roof contains the number **= 17**. The main body is a rectangle divided into four horizontal sections by solid lines. A vertical dashed line runs down the center of each section. Horizontal dashed lines are placed in the middle of each section, creating a grid for writing the division process.

③

a)

A house-shaped grid for division. The roof contains the number **= 18**. The main body is a rectangle divided into four horizontal sections by solid lines. A vertical dashed line runs down the center of each section. Horizontal dashed lines are placed in the middle of each section, creating a grid for writing the division process.

b)

A house-shaped grid for division. The roof contains the number **= 19**. The main body is a rectangle divided into four horizontal sections by solid lines. A vertical dashed line runs down the center of each section. Horizontal dashed lines are placed in the middle of each section, creating a grid for writing the division process.
