

①

a)

A house-shaped subtraction grid with a triangular roof. Inside the roof is the equation  $= 29$ . The main body of the house is divided into four horizontal sections by solid lines. Each section contains a vertical dashed line with a minus sign ( $-$ ) in the center, representing a subtraction problem. Dotted lines are present on the left and right sides of each section to indicate where to write the numbers.

b)

A house-shaped subtraction grid with a triangular roof. Inside the roof is the equation  $= 22$ . The main body of the house is divided into four horizontal sections by solid lines. Each section contains a vertical dashed line with a minus sign ( $-$ ) in the center, representing a subtraction problem. Dotted lines are present on the left and right sides of each section to indicate where to write the numbers.

②

a)

A house-shaped subtraction grid with a triangular roof. Inside the roof is the equation  $= 37$ . The main body of the house is divided into four horizontal sections by solid lines. Each section contains a vertical dashed line with a minus sign ( $-$ ) in the center, representing a subtraction problem. Dotted lines are present on the left and right sides of each section to indicate where to write the numbers.

b)

A house-shaped subtraction grid with a triangular roof. Inside the roof is the equation  $= 26$ . The main body of the house is divided into four horizontal sections by solid lines. Each section contains a vertical dashed line with a minus sign ( $-$ ) in the center, representing a subtraction problem. Dotted lines are present on the left and right sides of each section to indicate where to write the numbers.

③

a)

A house-shaped subtraction grid with a triangular roof. Inside the roof is the equation  $= 33$ . The main body of the house is divided into four horizontal sections by solid lines. Each section contains a vertical dashed line with a minus sign ( $-$ ) in the center, representing a subtraction problem. Dotted lines are present on the left and right sides of each section to indicate where to write the numbers.

b)

A house-shaped subtraction grid with a triangular roof. Inside the roof is the equation  $= 42$ . The main body of the house is divided into four horizontal sections by solid lines. Each section contains a vertical dashed line with a minus sign ( $-$ ) in the center, representing a subtraction problem. Dotted lines are present on the left and right sides of each section to indicate where to write the numbers.

①

a)

A house-shaped subtraction grid with a triangular roof containing the result  $= 29$ . The main body is a rectangle divided into four horizontal rows. Each row contains a subtraction problem:  $30 - 1$ ,  $31 - 2$ ,  $32 - 3$ , and  $33 - 4$ . Vertical lines separate the numbers, and horizontal lines separate the rows.

b)

A house-shaped subtraction grid with a triangular roof containing the result  $= 22$ . The main body is a rectangle divided into four horizontal rows. Each row contains a subtraction problem:  $23 - 1$ ,  $24 - 2$ ,  $25 - 3$ , and  $26 - 4$ . Vertical lines separate the numbers, and horizontal lines separate the rows.

②

a)

A house-shaped subtraction grid with a triangular roof containing the result  $= 37$ . The main body is a rectangle divided into four horizontal rows. Each row contains a subtraction problem:  $38 - 1$ ,  $39 - 2$ ,  $40 - 3$ , and  $41 - 4$ . Vertical lines separate the numbers, and horizontal lines separate the rows.

b)

A house-shaped subtraction grid with a triangular roof containing the result  $= 26$ . The main body is a rectangle divided into four horizontal rows. Each row contains a subtraction problem:  $27 - 1$ ,  $28 - 2$ ,  $29 - 3$ , and  $30 - 4$ . Vertical lines separate the numbers, and horizontal lines separate the rows.

③

a)

A house-shaped subtraction grid with a triangular roof containing the result  $= 33$ . The main body is a rectangle divided into four horizontal rows. Each row contains a subtraction problem:  $34 - 1$ ,  $35 - 2$ ,  $36 - 3$ , and  $37 - 4$ . Vertical lines separate the numbers, and horizontal lines separate the rows.

b)

A house-shaped subtraction grid with a triangular roof containing the result  $= 42$ . The main body is a rectangle divided into four horizontal rows. Each row contains a subtraction problem:  $43 - 1$ ,  $44 - 2$ ,  $45 - 3$ , and  $46 - 4$ . Vertical lines separate the numbers, and horizontal lines separate the rows.
